Jason,

Did you want me to set something up or you are going to do that next week? Thanks.

Phillip,

I have scanned through the CalEPA document and our PPRTV for this chem. Is interesting that we found a study that CalEPA did not, and they found studies we did not. I think someone should take a hard look at the CalEPA document. I recommend we discuss this as a group early next week to determine a path forward. I have some ideas

Hi Jason and Belinda,

The STSC has received a request from Region 9 regarding para-chlorobenzene sulfonic acid (pCBSA), please see email train below. The requestor would like us to review a CalEPA document (attached) and do an update PPRTV for pCBSA (there is currently a no value from 2009). With regards to reviewing the CalEPA document, can either of you recommend staff from either branch that has time to complete the review and a possible timeframe? The document is 27 pages long. The requestor would like it by the end of this month but that's probably not feasible. Annette suggested maybe mid to late April in the email below. Please let me know if you have any questions. I appreciate any help you can provide.

Thanks,  
Phillip

So we respond back with an appropriate time table for review. Give time for Risky Business so I would say mid to late April. As to the PPRTV we need to discuss with Michele and Mike S. For now we could do a quick updated lit search to check and see if anything is new from the old no value PPRTV. If nothing new not much we can do.

**Importance:** High

Annette,

Please see below and advise how to proceed. It looks like he wants us to do both the review and a PPRTV. Also, reviewing this by the end of the month is really pushing it. We have so many other tasks going on right now and honestly, I am not sure who we have that could turn this review around in that short time frame. Thanks.

Hi Phillip,  
Since the time table is so long for an updated PPRTV, there is no new data since the previous 2009 review we did, start both. We need the Cal review by the end of the month as this may be going into a ROD amendment. Can you do that?  
Dan

Hi Daniel,

I'm Phillip Kaiser, the Hotline Director for the STSC. Teresa Shannon forwarded me your previous email regarding pCBSA and I just wanted to get some clarification. Would you like us to review the available literature search for pCBSA and determine the feasibility of completing an updated PPRTV assessment or would you like us to complete a formal review of the CalEPA document that you sent to Teresa? Please note that the completion of an updated PPRTV assessment for pCBSA will require an estimated 9-12 month timetable, as the assessment will have to go through the standard review and clearance processes.

Thanks,  
Phillip
